DETAILED ACTION

This Application has been examined. The claims 29-40 are pending. The examination results are as following.

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: None of the cited art teaches or suggests that a system or method of a liquid crystal display having an actuation device for selective activation of the at least one conductive segments and of the at least one inverse segment, wherein the activation system for a time interval, allows simultaneous activation of the at least one conductive segments and of the at least one inverse segment, such that during the time interval it is possible to recognize failure of any portion of at least one conductive segments by their inverse appearance relative to the at least one inverse segment as claim 29; or simultaneously activating all conductive segments of the first plate and of the at least one inverse segment for a first time interval to enable an observer to detect failed conductive segments by their inverse appearance relative to the at least one inverse segment; and the conductive segments that are not to be displayed and the at least one inverse segment remain inactivated as claim 37.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
